## BIANCHI CV INTEGRATED VIBRATION CANCELLING SYSTEM

Bianchi collaborated with **Materials Sciences Corporations** to develop our innovative and exclusive use of the **MSC's** patented Countervail® integrated vibration cancelling system for cycling.

Countervail® is a patented viscoelastic carbon material with a unique fiber architecture that cancels up to 80% of vibrations while increasing the stiffness and strength of our carbon frames and forks. Countervail is embedded within the layup of Bianchi CV high-performance models: **Specialissima**, **Infinito CV** and **Aquila CV**.

## PROVEN IN NASA AEROSPACE OPERATIONS

Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon Countervail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.

- Wrinkles in the carbon material affect the property of the whole frame and add more weight
  - Bianchi avoid wrinkles by pre-tuning the thickness of the laminate of each frame
  - Increased frame and process efficiency
  - Reduced weight
- Bike with this technology: **Oltre XR.2**

### DISC BRAKE

Bianchi introduces new QR thru axle for road bikes (only 31gr weight). Both Infinito CV and Intenso endurance carbon bikes feature a 12mm x 100/135mm thru axle with QR system removable. Bike with this technology: **Infinito CV**; **Intenso**

- Bianchi's unique process to internally mold X-woven structural carbon layer
- Carbon strips are molded into the carbon structure of the head tube and BB area
- Exceptional torsional rigidity proven by Bianchi's professional riders

Bike with this technology: **Oltre XR.2**

**MAXIMUM RIGIDITY**

**ULTRA THIN  
SEAT STAY**

- Improved shock absorption and impact resistance
- Reduced frame weight
- Power transmission is now focused through the chain stays, leaving the seat stays as a compliant support structure

Bikes with this technology: **Oltre XR.2; Oltre XR.1; Sempre PRO**

### **TRIPLE HYDROFORMED TECHNOLOGY**

- Utilized at the top tube and head tube
  - The tubes are welded together after initial hydroforming then inserted into another hydroforming mold and reshaped through the same process
  - Provides a clean monocoque appearance while increasing the strength and steering response of the frame
- Bike with this technology: **Impulso**

**K-VID**

- The combination between **Bianchi Active Technology** and the **Kevlar Vibration Isolating Device** allows us to obtain different stiffness behaviors under different forces directions, without wasting power transfer
  - Special design of the rear rectangle
  - **Kevlar** insertions in the seat stays and the carbon fork
  - Improved shock absorption and adherence on the road
- Bikes with this technology: **Infinito CV** (only BAT); **Intenso; Impulso; Via Nirone 7**

**Robert Gesink**

@RGUpdate

Love this bike. Great climbing in the Tour,  
max control in descents

@BianchiOfficial

## RACING

Ride beyond limits. The Racing category includes extreme racing performance carbon frames, optimized to achieve the most efficient power transmission with the best rigidity to weight ratio. The ideal bikes for the most expert riders.

## ENDURANCE RACING

Long distances must be covered in the optimal riding position. Endurance frames guarantee maximum performance with minimum stress for the riders, thanks to Bianchi's special frame design/geometry and different material combination.
