2017

BIA NCHI FOR SCUDERIA FERRARI
Collaboration with Ferrari to develop a new Scuderia Ferrari bicycle range

METHANOL CV
The first MTB engineered with Countervail®
Bianchi collaborated with Materials Sciences Corporation to develop our innovative and exclusive use of the MSC’s patented Countervail® integrated vibration cancelling system for cycling. Countervail® is a patented carbon material with a unique fiber architecture and viscoelastic resin that cancels 80% of vibrations while increasing the stiffness and strength of our carbon frames and forks. Countervail® is embedded within the layup of Bianchi CV high-performance models.

PROVEN IN NASA AEROSPACE OPERATIONS
Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon Countervail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.

Bikes with this technology:
Specialissima, Oltre XR4, Oltre XR3, Infinito CV, Aquila CV and Methanol CV

ONE TECHNOLOGY, TUNED FOR EVERY NEED.

COUNTervail® CARBON MATERIAL IS INTEGRATED INTO THE BIANCHI CV CARBON FRAMES.
Bianchi Tavolozza is the exclusive web color configurator introduced for Oltre XR4 and Specialissima, Bianchi premium models engineered with Countervail® vibration cancelling technology.

All Oltre XR4 and Specialissima frames, including graphics and logos, are hand-painted and decals applied by expert craftsmen, combining Bianchi timeless skills of tailoring together with advanced technologies.

USER-FRIENDLY AND CREATIVE TAILOR-MADE PROGRAM

By entering www.bianchi.com/tavolozza, you can easily design your own project in a few clicks, meeting any wish. Tavolozza offers an infinity of possible combinations.

**OLTRE XR4**:
- **15 OPTIONS** / Frame and fork’s color
- **14 COLORS** / Inserts
- **6 OPTIONS** / Bianchi logo
- Glossy and matt finishing

**SPECIALISSIMA**:
- **24 OPTIONS** / Frame and fork’s color
- **15 COLORS** / Graphics
- Glossy and matt graphics finishing
- **2 OPTIONS** / Bianchi eagle on seat tube

FAST AND SOCIAL

After creating the ideal layout for your Oltre XR4 or Specialissima, you can save and download the project, identified by a unique code. Thanks to the online dealer locator, you can find the nearest Bianchi authorized dealer where to order the custom-painted bike.

Tavolozza also gives you the opportunity to immediately share your own project on Facebook.
TECHNOLOGIES

ROAD TECHNOLOGIES

Bianchi designs every disc brake model with road bikes specific thru axle. Aria, Impulso Allroad, Impulso E-Road/E-Allroad and Edoardo have 12 x 100/142mm thru axle with quick release lever. Both Infinito CV and Intenso Endurance carbon frames feature a lightweight (only 31gr.) 12 x 100/135mm thru axle with removable QR system.

Bikes with this technology:
- ARIA
- INFINITO CV
- INTENSO
- IMPULSO ALLROAD
- VIA NIRONE 7 ALLROAD
- INFINITO CV
- IMPULSO E-Road/E-Allroad
- EDOARDO (E-SPORT)

Reinforcement carbon ribs embedded into the main tube profiles torsional stiffness of the head tube and the Bottom Bracket area. The crank-frame interface becomes stronger.

Bikes with this technology:
- ALL METHANOL

Special designed stays with “S” shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness.

Bikes with this technology:
- ALL METHANOL
- GRIZZLY

Hydroforming process of the top and head tubes.

Top and head tubes are welded and then fused together into a monocoque structure.

Bike with this technology:
- ALL IMPULSO

MTB TECHNOLOGIES

Road disc brake system

Bianchi designs every disc brake model with road bikes specific thru axle. Aria, Impulso Allroad, Impulso E-Road/E-Allroad and Edoardo have 12 x 100/142mm thru axle with quick release lever. Both Infinito CV and Intenso Endurance carbon frames feature a lightweight (only 31gr.) 12 x 100/135mm thru axle with removable QR system.

Bikes with this technology:
- ARIA
- INFINITO CV
- INTENSO
- IMPULSO ALLROAD
- VIA NIRONE 7 ALLROAD
- INFINITO CV
- IMPULSO E-Road/E-Allroad
- EDOARDO (E-SPORT)

Reinforcement carbon ribs embedded into the main tube profiles torsional stiffness of the head tube and the Bottom Bracket area. The crank-frame interface becomes stronger.

Bikes with this technology:
- ALL METHANOL

Improved shock absorption and impact resistance

Special lay-up and different material combinations (CARBON - KEVLAR)

Bikes with this technology:
- ALL METHANOL
- GRIZZLY

Power transmission is now focused through the chain stays, leaving the seat stays as a compliant support structure.

Bikes with this technology:
- ULTEGRA XRS / MPM PRO

To obtain different stiffness behaviour under different directional forces, without wasting power transfer.

Special lay-up and different material combinations (CARBON - KEVLAR)

Special designed

Bikes with this technology:
- INFINITO CV (very hard)
- INFINITO / IMPULSO / VIA NIRONE 7

Improved shock absorption and impact resistance

Reduced frame weight

Bikes with this technology:
- ALL METHANOL

Boost is a new wheel and drivetrain specification.

Increased wheel stiffness and durability

Better riding efficiency and ease handling precision

Improved frame geometry with shorter chain stays

Wider range of shimming options

More clearance for bigger tires

Bikes with this technology:
- ALL METHANOL / GRIZZLY

Optimized rear stays design to obtain a stiffness and structural rear triangle without worsening on-climb efficiency. It fits different chainring combinations and it is optimized to improve power transmission on the drivetrain.

Bikes with this technology:
- ALL METHANOL

Optimized rear stays design to obtain a stiffness and structural rear triangle without worsening on-climb efficiency. It fits different chainring combinations and it is optimized to improve power transmission on the drivetrain.

Bikes with this technology:
- ALL METHANOL

Special designed stays with “S” shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness.

Bikes with this technology:
- ALL METHANOL
- GRIZZLY

148mm axle spacing (THRU)

+6mm offset

8mm travel

Optimized rear stays design to obtain a stiffness and structural rear triangle without worsening on-climb efficiency. It fits different chainring combinations and it is optimized to improve power transmission on the drivetrain.

Bikes with this technology:
- ALL METHANOL

8 — 9
BIANCHI PRODUCT DEVELOPMENT

IDEA
Ideas are the seeds of our continuous innovation process, together with a mix of intuitions, Italian creativity, experience and attention to details.

01

GEOMETRIES
We offer dedicated geometries for all type of riding and different performance. Bianchi is widely known for its race proven geometries.

02

3D
We are expert in frame design and technology. We believe the frame is the heart of the bicycle.

03

RAPID PROTOTYPING
Thanks to our Rapid Prototype Machine we can make and assemble, in house, a resin prototype of every model so that we can check the shape and final look of the frame before starting final production.

04

GRAPHICS
All graphics and color combinations are created by our creative designers, in Treviglio.

05

LAB TEST
All frames are developed and tested inside the Bianchi headquarters in Treviglio (Bergamo, Italy) with innovative and dedicated machines.

06

ROAD TEST
Our team of professional test riders and former pro-cyclists is constantly testing all new products collecting and providing important feedbacks to our engineers with the aim to produce the best bikes in the world.

07

ASSEMBLY PROCESS
We have a unique individual vertical assembly process: each bicycle is built by one person.

08
Racing

Ride beyond limits.

The Racing category includes extreme racing performance carbon frames, optimized to achieve the most efficient power transmission with the best rigidity to weight ratio. The ideal bikes for the most expert riders.

We developed the road steel vintage bikes following Bianchi’s historical knowledge and frame building expertise from the 20th century.
These bikes are designed for those who have changed the road racing mentality into something different. The ALLROAD is a mountain bike, a road bike, a cyclocross and a trekking bike all-in-one. The ALLROAD bike can be used in a Marathon event but also will take you out to explore the raw finish roads.

PISTA FIXED GEAR

In the US the messengers bikes started being a “cool” factor to kids who were growing out of skateboarding. Also in Europe it has become fashionable as lifestyle. Track bikes for track use that are sold for urban use.
Fast, light and aggressive. The XC Bianchi frames are built to offer maximum power transfer combined with stability and precise handling. Our Cross Country bikes are designed to offer optimal performance for professional racers and anyone who wants to enjoy a thrilling ride in the woods.

---
The Bianchi Trail bikes offer the great riding ability of a XC bike combined with a specifically designed geometry that gives excellent bike control. Bianchi Trail bikes are ideal for Marathon events or all-day rides in the mountains.
The modern Bianchi Enduro bikes are designed for fast, exciting multi-use riding. We design the bikes so you can easily reach the summit of every climb and then give your all on the descents. The suspension offers superb, trusted performance for fast, adrenaline-fueled descending.
Unlike a conventional bicycle which relies purely on your efforts, a Bianchi e-bike gives you powered pedal assistance up to speeds of 25kph. You choose your desired level of assistance as you pedal, from gentle right through to intense, depending on how you wish to ride. And you win every way.

Whether you're an urban commuter, holiday traveller, returning rider, or a serious cyclist with road or mountain ambitions, there's a Bianchi e-bike that's just right for you.
