#RIDEBIANCHI

# ADVANTAGES OF BIANCHI E-BIKES

A traditional bike works according to the amount of force you put on the pedals. Instead, Bianchi's E-bikes power-assist your pedal stroke up to a speed of 25km/hr. Choose the level of assistance that's best for you and how you're feeling, whether it be a light or intense boost. In any case, you will be the winner.

## POWER AND PERFORMANCE

With a Bianchi e-bike, your cycling performance is improved because every pedalling effort you make can be assisted. The power unit can easily be controlled to give a little help or a lot of help, so every journey you make you get there faster, and using less effort.

## ECO-FRIENDLY

Travelling by Bianchi e-bike you're reducing pollution levels and making a positive environmental contribution that benefits everyone. On your e-bike you can cruise past stressful congested traffic, avoid producing harmful emissions. Just as your assisted pedaling efforts are far more sustainable, investing in an e-bike is an environmentally sustainable, intelligent choice for an ecologically-conscious cyclist.

## HEALTH & WELLBEING

Our e-bikes are able to enhance your level of fitness and open up a wealth of new riding possibilities. Because you're still pedaling, and can select the amount of assistance you receive at any time, riding an e-bike lets you enjoy all the health and wellness benefits of a conventionally powered bicycle. Your heart rate rises, your muscles get a gentle all-over workout and your lungs work better than ever. Getting fitter, enjoying the open air, taking back control and meeting your challenges feed a new level of mental and emotional wellbeing.

## MAXIMUM EFFICIENCY

Riding an e-bike will save you the stress and will see you arriving fresh and relaxed at your destination. No more time wasted queueing or searching for parking spaces – take back control of every journey. Now you're free to run your own schedule and plan your own time. Maintenance is also easy. All you need is your e-bike and away you go.

# BIANCHI E-BIKE TYPES

Whether you're an urban commuter, holiday traveller, returning rider, or a serious cyclist with road or mountain ambitions, there's a Bianchi e-bike that's just right for you.

## E-ROAD/E-ALLROAD

The E-ROAD/E-ALLROAD range is perfect for the active cyclist. With long-lasting battery range, you can go beyond the limits of a traditional road bike while staying relaxed and enjoying the scenery. You can ride further and higher than ever. See more places and meet more people along the way. If you've ever had to say no to a solo bike ride or group ride with friends, here's your solution.

## E-MTB

If you're looking to get out on the trails and become one with nature, the Bianchi E-MTB range will take you to explore new and extraordinary peaks. Climbing those impossible mountains is now a reality and the most difficult trails are now the most fun. With a power-assisted mountain bike your rides will not only become longer as you can also bike to higher places and push harder than before, allowing yourself to try many new trails, sceneries, challenges, and experiences. You can nearly fly to the top of the climbs, go distances that you never imagined possible, and ride more often with your well-trained friends: all you have to do is adjust the assistance level according to where you're riding and who you're riding with. And naturally, what goes up must come down, there's always the descent to enjoy as well!.

## E-SPORT

The E-SPORT range is ideal for fitness and tourism, and for exploring new cities and places. Routes that once seemed too long and too difficult are now the ideal rides for you. The Bianchi E-SPORT range gives the extra power needed to your rides, whether you're alone or with family and friends, while you explore new places, enjoy your vacation or free time, and get in better shape without focusing too much on your personal performance.

## E-CITY

With a comfortable, yet efficient fit, the Bianchi E-CITY bikes are perfect for moving around the city or commuting to work. Flow with the traffic with power-assisted pedaling, and skip the lines thanks to easy and flexible steering. Getting to your office or meeting your friends has never been easier. If you're looking for smart mobility with style, you're on the right track. Our E-CITY range will get you to your destination more quickly and easily, and in the most reliable way you could imagine.
