ONE TECHNOLOGY, TUNED FOR EVERY NEED.

BIANCHI CV INTEGRATED VIBRATION CANCELLING SYSTEM

Bianchi collaborated with Materials Sciences Corporations to develop our innovative and exclusive use of the MSC's patented CounterVail® integrated vibration cancelling system for cycling. CounterVail® is a patented carbon material with a unique fiber architecture and viscoelastic resin that cancels 80% of vibrations while increasing the stiffness and strenght of our carbon frames and forks. CounterVail® is embedded within the layup of Bianchi CV high-performance models.

PROVEN IN NASA AEROSPACE OPERATIONS

Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon CounterVail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.
