Bianchi’s integrated vibration cancelling system for cycling, with innovative and exclusive use of MSC’s patented Countervail® material.

Bikes with this technology: Methanol CV

**BIANCHI CV INTEGRATED VIBRATION CANCELLING SYSTEM**

Bianchi collaborated with Materials Sciences Corporations to develop our innovative and exclusive use of the MSC’s patented Countervail® integrated vibration cancelling system for cycling. Countervail® is a patented viscoelastic carbon material with a unique fiber architecture that cancels up to 80% of vibrations while increasing the stiffness and strength of our carbon frames and forks. Countervail is embedded within the entire frame of Bianchi CV high-performance MTB models: Methanol CV.

**PROVEN IN NASA AEROSPACE OPERATIONS**

Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon Countervail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.
Reinforcement carbon ribs embedded into the main tube profiles torsional stiffness of the head tube and the Bottom Bracket area. The crank-frame interface becomes stronger.

Bikes with this technology: All Methanol

**SHOCK ABSORBINE STAYS**

- Special designed stays with “S” shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness.
- Increased shock absorption
- Increased power transmission

Bikes with this technology: Methanol FS, SX; Ethanol and all Jab

**BOOST 148**

- Boost is a new wheel and drivetrain specification
- Increased wheel stiffness and durability
- Better riding efficiency and bike handling precision
- Improved frame geometry with shorter chain stays
- Wilder range of chainring options
- More clearance for bigger tires

Bike with this technology: Methanol CV, SX; Jab Plus, Ascent

**ASYMETRICAL REAR STAYS**

- Optimized rear stays design to obtain a very compact and reactive rear triangle without sacrificing on chainline clearance.
- It fits different chainrings combinations and it is optimized to improve power transmission on the driveside.
- Increased power reactivity
- Increased pedalling performance

Bikes with this technology: All Methanol
FAST, LIGHT AND AGGRESSIVE. OUR CROSS COUNTRY BIKES ARE DESIGNED TO OFFER OPTIMAL PERFORMANCE FOR PROFESSIONAL RACERS AND ANYONE WHO WANTS TO ENJOY A THRILLING RIDE IN THE WOODS. THE XC BIANCHI FRAMES ARE BUILT TO OFFER MAXIMUM POWER TRANSFER COMBINED WITH STABILITY AND PRECISE HANDLING.
