CLOTHING

#### **E1 ABSORPTION® (ANTIABRASIVO) - MAXIMUM COMFORT**

Eschler e1 fabrics actively absorb perspiration without drying out the skin. Thanks to their hygienic, skin-friendly qualities and freedom of movement, they ensure outstanding wearer comfort.

#### **FY3515DW**

Windproof fabrics and water repellent.

#### **INTERLACCIATO**

100% polyester microfiber. Soft and comfortable, it adapts perfectly to body and maintain a constantly pleasing contact with the skin. It's antibacterial approved and it permits excellent moisture passage.

#### **INTERPOWER® - EFFICIENCY OF MOVEMENT**

A new generation jersey performing fabric produced employing our DUAL e REPOC technologies. Its particular weaving brings to a reduction of the contact points between the worn garment and the skin (REPOC reduced point of contact).

This generates a micro-circulation of the air thus avoiding an unpleasant feeling of a sticky fabric on humid skin, producing a well-being, comfortable and free sensation. Furthermore our DUAL weaving technology combined with our Interpower treatment helps in removing quickly the sweat to the outside and assures an ever-dry effect. The greater comfort and the well-being sensation that a DUAL fabric generates, can contribute to improving the performances and reducing the fatigue feeling.

#### **LITTLE SNOW**

Stretch pile.

#### **KEY KARGO**

Key Largo is new extra-comfort fabric by Moa Sport. It's soft and soft touch, elastic, lightweight and gives an excellent fit. Performance is enhanced.

#### **LYCRA® - MAXIMUM COMFORT**

Based on years of performance research into textiles, lycra® sport fabric combines stretch fibre technology with demanding fabric performance testing standards designed for sporting activities that require a combination of:

Lightweight - breathability - Muscle support - freedom of movement.

#### **MANTODRY**

Moisture is generated on the skin through transpiration. The fabric absorbs this moisture and quickly wicks it away. The optimized synthetic fibre carries out constant evaporation and more effective heat exchange. The result is a sensation of freshness on the skin.

Properties: • Breathable • resists delicate washing.

#### **MANTOTEX® - HEAT RAIN REGULATING MEMBRANE**

A thermoregulating membrane that offers excellent protection against water and wind, and maintains the microclimate between skin and fabric. Light and elastic, it wicks away perspiration for maximum comfort.

- Excellent stretch and shape recovery • Water resistance >10.000 mm (uni en 20811/93) • High breathability 900 g/m2 day (uni 4818 26/92) • Wind resistance from 0 to 5 mbar, l/min 10 cm2 (din 53887-1995) • High resistance to light (uva uvb rays)
- Does not swell in water
- Resistance to delamination 5 (uni en iso 105 e01/98)

#### **MANTOVENT - WIND PROTECTION**

A new direction in research and development of breathable air-resistant coatings. Thanks to the unique structure and composition (100% pu) of the polymer, this is a concrete solution for creating highly protective fabrics and garments with truly long-lasting performance, strong and at the same time soft TOUCH, elastic and light.

- Unequalled stretch and shape recovery • Permeability to water vapour (breathability): 500/m2x24h uni 4818 part 26.
- Permeability to air: wind resistance 15mm/s uni en iso 9237/97. • Resistant to dry cleaning and machine washing at 30°C

#### **MANTO W.R.T.**

This revolutionary water repellent treatment rejects water with pearly effect. In the same way oil and mud are rejected so that they can not enter into the fibers. The result is an easily process of wash clothes

#### **NORTEX EXPLOSIVE LYCRA**

This 4 way elastic fabric fully embrace the body parts under stress giving an excellent fit. Performance is enhanced and improved by the reduction of muscle vibration which is one of the main causes of pain and fatigue.

#### **NORTEX SUSHI 85 G/M2**

100% polyester microfiber. Lightweight, wind and water repellent fabric.

#### NEW PORT-XTRA-LIFE - HIGH TECHNICAL PERFORMANCE

Newport is a next-generation fabric, designed to offer high technical performance. Thanks to the use of Xtra Life LYCRA®, Newport offers greater resistance to washing, perfect fit and lasting shape-retention. While exceeding the requirements of the innovative LYCRA® Sport programme, Newport sustains muscles perfectly, decreasing muscle fatigue and improving the athlete's performance. High protection against UV rays (UPF 50+), fast drying and perfect adherence to the body are just some of the characteristics that make Newport the perfect fabric for swimming and water sports in general. It is also exceptional for technical sportswear and more intense sports like cycling and running.

#### SHIELD

A classical double opposite interlace warp knitted fabric, made with an exclusive super dull polyester yarn and elasthan with our newest SUPER 40 new generation looms. A comfortable and performing fabric which has its main strength point in the outstanding covering feature which makes this fabric no see through even when wet. Thanks to its construction and stretch characteristics, its high compression and high content of elasthan Performer W has reached the Mititech Power® certification which combines the highest values of elongation, compression and wicking properties.

#### SUMMERTIME SPECIAL - SOFT TOUCH

SUMMERTIME SPECIAL is the new extra comfort fabric made by Moa sport. Produced with microfiber yarns, it gives to the garment the pleasant feeling of a soft touch and good movement. Elastic and light weight, it grants the perfect fit and a great performance, coming from its fast drying and utmost perspiration. Summertime special: a caress of wellbeing and comfort.

#### VUELTA® - HIGH PERFORMANCE

An innovative bi-elastic techo fabric with LYCRA® developed for cycling, running, fitness and high-performance sportswear in general. Soft, comfortable and with a pleasant hand feel, VUELTA offers excellent benefits in terms of breathability, high resistance to pilling and abrasion as well as an exclusive anti-bacterial treatment that blocks the proliferation of bacteria.

#### ZAFFIRO

A warp-knitted innovative fabric showing the classic opposed double weaving, produced employing particular full dull multifilament polyamide yarns and Lycra power® using looms of the latest SUPER 40 generation. Its high compactness and density features, as well as its modulus and its multidirection balanced elasticity with power effect, confere outstanding stoutness and durability features. Engineered to be durable in time, it is particularly suitable and suggested for all uses where stoutness, durability as well as comfort and performances are researched and appreciated. It is very compact, extremely stretch and comfortable, prepared with wicking finish which allows a quick drying and excellent moisture management.

## PADS

#### MAX²

MAX² is the evolution of our Coolmax chamois. The anatomical shape and the multiple density foam layer make this padding great for any cycling activity, both, indoor and outdoors. The antibacterial microfiber, the absence of stitching in contact with the skin and the central channel in the perineal area assure maximum comfort on the saddle.

#### UCN

New anatomic pad developed by nalini research and made of the latest and most up-to-date microfiber its softness and flexibility gives a unique sensation of comfort never felt before. To soften and protect the leather bottom, preventing it from hardening, always spread it with relief cream after every use.

#### 2.1 SERIES M80

has been designed by Moa for the amateur male cyclist and features excellent wearability, thanks to the elasticity of the materials used. An innovative manufacturing technique and stabilisation at the saddle point constantly force the rider to assume a correct position on the bike. The hydrophilic and water-repellent qualities of the components mean excellent draining and a consequent fresh feeling.

#### CARINA PAD

Made by an ideal density foam (10 mm) and has been studied to contour perfectly ladies body creating a sensation of comfort even under stress and long rides.

#### LUCKY PAD

High tech moulded anatomic pad with high density foam (10 mm). The 4-wayelastic pad with differentiated density foam adapts perfectly to the body.
