

Bianchi

MTB

INCREASED RIGIDITY

- The down tube features a further inner carbon blade that makes up two separate bondless chambers
- Increased strength and rigidity to weight ratio
- Improved ride control

Bikes with this technology:
all **Methanol SL; SX and FS**

- Reinforcement carbon ribs are embedded into the main tubes profiles
- Increased torsional stiffness of the head tube and the Bottom Bracket area
- The crank-frame interface becomes stronger

Bikes with this technology:
all **Methanol SL; SX and FS**

TITANIUM PROTECTION

- A titanium net is molded together with the carbon fiber on the down tube to protect the frame from possible impacts with stones and material thrown by the front wheel
- Improved impact resistance and frame lifetime

Bikes with this technology:
all **Methanol SL; FS**

DFIS

Possibility to cut the carbon seat tube and insert a traditional seat post (31,6mm) thanks to precise thickness calibration along the whole integrated seat post.

Bikes with this technology: all **Methanol SL**

SHOCK ABSORBING STAYS

- Special designed stays with "S" shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness
- Increased power transmission

Bikes with this technology: all **Methanol**; **Ethanol** and all **Jab**

ASYMMETRICAL REAR STAYS

- Optimized rear stays design to obtain a very compact and reactive rear triangle without sacrificing the chainline clearance. It fits different chainrings combinations and it is optimized to improve power transmission on the driveside
- Increased power reactivity and pedalling performance

Bikes with this technology: all **Methanol**

XC CROSS COUNTRY

Fast, light and aggressive. Our Cross Country bikes are designed to offer optimal performance for professional racers and anyone who wants to enjoy a thrilling ride in the woods. The XC Bianchi frames are built to offer maximum power transfer combined with stability and precise handling.
