COUNTERVAIL® CARBON MATERIAL
IS INTEGRATED INTO THE BIANCHI
CV CARBON FRAMES.

ONE TECHNOLOGY, TUNED FOR EVERY NEED.

BIANCHI CV INTEGRATED VIBRATION CANCELLING SYSTEM

Bianchi collaborated with Materials Sciences Corporations to develop our innovative and exclusive use of the MSC's patented Countervail® integrated vibration cancelling system for cycling. Countervail® is a patented viscoelastic carbon material with a unique fiber architecture that cancels up to 80% of vibrations while increasing the stiffness and strength of our carbon frames and forks. Countervail is embedded within the layup of Bianchi CV high-performance models.

PROVEN IN NASA AEROSPACE OPERATIONS

Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon Countervail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.

Bike with this technology: **Specialissima, Oltre XR4, Infinito CV, Aquila CV and Methanol CV.**

Specialissima

**PURE POWER
AND CONTROL**

ENGINEERED WITH

Ultraxr4

**MAXIMIZE AERO ADVANTAGE
AND CONTROL**

Infinita CV

**LESS FATIGUE
MORE CONTROL**

AQUILA CV

**MORE ENERGY
MORE CONTROL**

METHANOL CV

**AFTER SHOCK
CONTROL**

ROAD TECHNOLOGY

TRIPLE HYDROFORMED TECHNOLOGY

- Hydroforming process of the top and head tubes
- Top and head tubes are welded and then fused together into a monocoque structure
- Final hydroforming process

Bike with this technology: **Impulso**

▲BAT▼ K-VID

- To obtain different stiffness behaviour under different directional forces, without wasting power transfer.
- Special lay-up and different material combination (CARBON - KEVLAR)
- Special design

Bikes with this technology: **Infinito CV (only BAT); Intenso; Impulso; Via Nirone 7 Alu**

Bianchi introduces new QR thru axle for road bikes (only 31gr weight). Both Infinito CV and Intenso endurance carbon bikes feature a 12mm x 100/135mm thru axle with QR system removable.

Bikes with this technology: **Infinito CV; Impulso; Intenso**

UT55 ULTRA THIN SEAT STAY

- Improved shock absorption and impact resistance
- Reduced frame weight
- Power transmission is now focused through the chain stays, leaving the seat stays as a compliant support structure

Bikes with this technology:
Oltre XR.1; Sempre

- Reinforcement carbon ribs embedded into the main tube profiles torsional stiffness of the head tube and the Bottom Bracket area. The crank-frame interface becomes stronger.

Bikes with this technology:

all Methanol

SHOCK ABSORBING STAYS

– Special designed stays with “S” shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness.

Bikes with this technology:
all Methanol; Ethanol and all Jab

ASYMMETRICAL REAR STAYS

– Optimized rear stays design to obtain a very compact and reactive rear triangle without sacrificing on chainline clearance. It fits different chainrings combinations and it is optimized to improve power transmission on the driveside.

Bikes with this technology:
all Methanol

BIANCHI PRODUCT DEVELOPMENT

01

IDEA

Ideas are the seeds of our continuous innovation process, together with a mix of intuitions, Italian creativity, experience and attention to details.

02

GEOMETRIES

We offer dedicated geometries for all type of riding and different performance. Bianchi is widely known for its race proven geometries.

03

3D

We are expert in frame design and technology.
We believe the frame is the heart of the bicycle.

04

RAPID PROTOTYPING

Thanks to our Rapid Prototype Machine we can create and assemble, in house, a resin prototype of every model so that we can check the shape and final look of the frame before starting final production.

05

GRAPHICS

All graphics and color combinations are created by our creative designers, in Treviglio.

07

ROAD TEST

Our team of professional test riders and former pro-cyclists is constantly testing all new products collecting and providing important feedbacks to our engineers with the aim to produce the best bikes in the world.

06

LAB TEST

All frames developed and tested inside the Bianchi headquarters in Treviglio (Bergamo, Italy) with innovative and dedicated machines.

08

ASSEMBLY PROCESS

We have a unique individual vertical assembly process: each bicycle is built by one person.

RACING

RIDE BEYOND LIMITS.
THE RACING CATEGORY INCLUDES
EXTREME RACING PERFORMANCE
CARBON FRAMES, OPTIMIZED TO
ACHIEVE THE MOST EFFICIENT
POWER TRANSMISSION WITH THE
BEST RIGIDITY TO WEIGHT RATIO.
THE IDEAL BIKES FOR THE MOST
EXPERT RIDERS.
