COUNTERVAIL® VIBRATION CANCELLING COMPOSITE TECHNOLOGY

ONE TECHNOLOGY, TUNED FOR EVERY NEED.

BIANCHI CV INTEGRATED VIBRATION CANCELLING SYSTEM

Bianchi collaborated with Materials Sciences Corporations to develop our innovative and exclusive use of the MSC's patented Countervail® integrated vibration cancelling system for cycling. Countervail® is a patented viscoelastic carbon material with a unique fiber architecture that cancels up to 80% of vibrations while increasing the stiffness and strength of our carbon frames and forks. Countervail is embedded within the layup of Bianchi CV high-performance models: Specialissima, Infinito CV and Aquila CV.

PROVEN IN NASA AEROSPACE OPERATIONS

Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon Countervail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.

Bike with this technology: [Specialissima](#); [Infinito CV](#); [Aquila CV](#)

TRADITIONAL CARBON FRAME CONTINUES TO VIBRATE

BIANCHI FRAME WITH COUNTERVAIL® IMMEDIATELY CANCELS VIBRATION

RACING / SPECIALISSIMA

PURE **POWER**
UNDER **CONTROL**

ENDURANCE / INFINITO CV

LESS **FATIGUE**
MORE **CONTROL**

TIME TRIAL & TRIATHLON / AQUILA CV

MORE **ENERGY**
MORE **CONTROL**

- Bianchi's unique process to internally mold X-woven structural carbon layer
- Carbon strips are molded into the carbon structure of the head tube and BB area
- Exceptional torsional rigidity proven by Bianchi's professional riders

Bike with this technology: [Oltre XR.2](#)

UTSS ULTRA THIN SEAT STAY

- Improved shock absorption and impact resistance
- Reduced frame weight
- Power transmission is now focused through the chain stays, leaving the seat stays as a compliant support structure

Bikes with this technology:
[Oltre XR.2](#); [Oltre XR.1](#);
[Sempre PRO](#)

- Wrinkles in the carbon material affect the property of the whole frame and add more weight
- Bianchi avoid wrinkles by pre-tuning the thickness of the laminate of each frame
- Increased frame and process efficiency
- Reduced weight

Bike with this technology: [Oltre XR.2](#)

TRIPLE HYDROFORMED TECHNOLOGY

- Utilized at the top tube and head tube
- The tubes are welded together after initial hydroforming then inserted into another hydroforming mold and reshaped through the same process
- Provides a clean monocoque appearance while increasing the strength and steering response of the frame

Bike with this technology: [Impulso](#)

▲BAT▼ K-VID

- The combination between Bianchi Active Technology and the Kevlar Vibration Isolating Device allows us to obtain different stiffness behaviors under different forces directions, without wasting power transfer
- Special design of the rear rectangle
- Kevlar insertions in the seat stays and the carbon fork
- Improved shock absorption and adherence on the road

Bikes with this technology: [Infinito CV \(only BAT\)](#); [Intenso](#); [Impulso](#); [Via Nirone 7 Alu](#)

ROAD DISC BRAKE SYSTEM

Bianchi introduces new QR thru axle for road bikes (only 31gr weight). Both Infinito CV and Intenso endurance carbon bikes feature a 12mm x 100/135mm thru axle with QR system removable.

Bikes with this technology: [Infinito CV](#); [Impulso](#)

TRIPLE WALL TUBE

- The down tube features a further inner carbon blade that makes up two separate bondless chambers
- Increased strength and rigidity to weight ratio
- Improved ride control

Bikes with this technology:
all Methanol SL; SX and FS

- Reinforcement carbon ribs are embedded into the main tubes profiles
- Increased torsional stiffness of the head tube and the Bottom Bracket area
- The crank-frame interface becomes stronger

Bikes with this technology:
all Methanol SL; SX and FS

- A titanium net is molded together with the carbon fiber on the down tube to protect the frame from possible impacts with stones and material thrown by the front wheel
- Improved impact resistance and frame lifetime

Bikes with this technology:

all Methanol SL; FS

DFIS

Possibility to cut the carbon seat tube and insert a traditional seat post (31,6mm) thanks to precise thickness calibration along the whole integrated seat post.

Bikes with this technology:

all Methanol SL

SHOCK ABSORBING STAYS

- Special designed stays with "S" shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness
- Increased power transmission

Bikes with this technology:

all Methanol; Ethanol and all Jab

ASYMMETRICAL REAR STAYS

- Optimized rear stays design to obtain a very compact and reactive rear triangle without sacrificing the chainline clearance. It fits different chainrings combinations and it is optimized to improve power transmission on the driveside
- Increased power reactivity and pedalling performance

Bikes with this technology:

all Methanol

BIANCHI PRODUCT DEVELOPMENT

1 IDEA

Ideas are the seeds of our continuous innovation process, together with a mix of intuitions, Italian creativity, experience and attention to details.

2 GEOMETRIES

We offer dedicated geometries for all type of riding and different performance. Bianchi is widely known for its race proven geometries.

3 3D

We are expert in frame design and technology. We believe the frame is the heart of the bicycle.

4 RAPID PROTOTYPING

Thanks to our Rapid Prototype Machine we can create and assemble, in house, a resin prototype of every model so that we can check the shape and final look of the frame before starting final production.

5 GRAPHICS

All graphics and color combinations are created by our creative designers, in Treviglio.

6 LAB TEST

All frames developed and tested inside the Bianchi headquarters in Treviglio (Bergamo, Italy) with innovative and dedicated machines.

7 ROAD TEST

Our team of professional test riders and former pro-cyclists is constantly testing all new products collecting and providing important feedbacks to our engineers with the aim to produce the best bikes in the world.

8 ASSEMBLY PROCESS

We have a unique individual vertical assembly process: each bicycle is built by one person.

RACING

Ride beyond limits. The Racing category includes extreme racing performance carbon frames, optimized to achieve the most efficient power transmission with the best rigidity to weight ratio. The ideal bikes for the most expert riders.

C-SPORT

Designed for those who are looking for a bike with strong character: solid like a mountain-bike, light and smooth like a road bike. Versatile bike, fast, reliable. Light weight and easy to carry. C-Sport bikes can find their natural habitat in the city as well in the countryside. The perfect bikes to take a spin on a weekend getaway
