VIBRATION CANCELLING COMPOSITE TECHNOLOGY

Bianchi's integrated vibration
cancelling system for cycling,
with innovative and exclusive
use of MSC's patented
Countervail® material.

Bikes with this technology:
Methanol CV

BIANCHI CV INTEGRATED VIBRATION CANCELLING SYSTEM

Bianchi collaborated with Materials Sciences Corporations to develop our innovative and exclusive use of the MSC's patented Countervail® integrated vibration cancelling system for cycling. Countervail® is a patented viscoelastic carbon material with a unique fiber architecture that cancels up to 80% of vibrations while increasing the stiffness and strength of our carbon frames and forks. Countervail is embedded within the entire frame of Bianchi CV high-performance MTB models: Methanol CV.

PROVEN IN NASA AEROSPACE OPERATIONS

Traditional passive damping in frames using superficial rubber inserts and isolators are marginally effective compared to the integrated carbon Countervail® system developed by Bianchi for cycling and proven in the extreme conditions of NASA aerospace operations.

METHANOL CV

**AFTER SHOCK
CONTROL**

MTB / XC CROSS COUNTRY

- / Reinforcement carbon ribs embedded into the main tube profiles torsional stiffness of the head tube and the Bottom Bracket area.
- / The crank-frame interface becomes stronger.

Bikes with this technology:
All Methanol

SHOCK ABSORBING STAYS

/ Special designed stays with "S" shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness.

- / Increased shock absorption
- / Increased power transmission

Bikes with this technology:
**Methanol FS, SX;
Ethanol and all Jab**

ASYMMETRICAL REAR STAYS

- / Optimized rear stays design to obtain a very compact and reactive rear triangle without sacrificing on chainline clearance.
- / It fits different chainrings combinations and it is optimized to improve power transmission on the driveside.
- / Increased power reactivity
- / Increased pedalling performance

Bikes with this technology:
All Methanol

BOOST 148

- / Boost is a new wheel and drivetrain specification
- / Increased wheel stiffness and durability
- / Better riding efficiency and bike handling precision
- / Improved frame geometry with shorter chain stays
- / Wilder range of chainring options
- / More clearance for bigger tires

Bike with this technology: **Methanol CV, SX; Jab Plus, Ascent**

XC CROSS COUNTRY

FAST, LIGHT AND AGGRESSIVE. OUR CROSS COUNTRY BIKES ARE DESIGNED TO OFFER OPTIMAL PERFORMANCE FOR PROFESSIONAL RACERS AND ANYONE WHO WANTS TO ENJOY A THRILLING RIDE IN THE WOODS. THE XC BIANCHI FRAMES ARE BUILT TO OFFER MAXIMUM POWER TRANSFER COMBINED WITH STABILITY AND PRECISE HANDLING.
